SENIOR PRODUCT MANAGER | CONSUMER LENDING | CREDIT DECISIONING | RISK & UNDERWRITING

Product leader with 7+ years building financial products that transform complex lending operations into seamless borrower experiences. Deep expertise in consumer credit, underwriting systems, risk management, and platform development. Personally architected and rebuilt a production loan origination and decisioning engine from scratch. Proven ability to balance portfolio performance with user experience while shipping products that drive measurable growth in regulated financial services.

EXPERIENCE

Vantaca | *Principal Product Manager*

Apr 2026 – Present

- **AI Platform:** Leading the AI platform that brings LLM-powered agents into Vantaca's community association management software—the shared foundation for model access, inference, evaluation, and observability that every product team builds on
- **Agent Governance:** Defining how AI agents act on behalf of customers—policies, permissions, guardrails, audit trails, and human-in-the-loop approvals—so agents can take real actions safely at enterprise scale
- **User & Agent Management:** Building unified identity, roles, and access control for both people and AI agents, so customers can see, control, and trust exactly what every user and every agent can do across their organization

Quantum Financial Technologies | *Senior Technical Product Manager – Platform*

Jan 2024 – Apr 2026

- **Decisioning Engine Platform (0→1):** Solely architected, rebuilt, and tested the company's core loan origination system and credit decisioning engine end-to-end—including underwriting logic, risk scoring models, and ML-driven inference pipelines—eliminating a \$2M/year vendor dependency and single-handedly driving the company to breakeven
- **Credit Strategy & Roadmap:** Defined and executed product roadmap for the lending platform, owning underwriting thresholds, loss modeling, risk tolerance rules, and cap structures across multiple loan products in partnership with data science and finance teams
- **Underwriting Automation:** Built automated credit workflows that replaced manual review processes with rules-based decisioning and intelligent escalation paths, reducing underwriting time and improving consistency at scale
- **Portfolio Performance:** Monitored portfolio health metrics including loss rates, delinquency, repayment behavior, and model calibration—implementing guardrails that reduced adverse selection and improved risk-adjusted returns
- **Lending Partnerships:** Led technical integrations with lending partners (SoFi, LendingTree), navigating complex banking networks to expand product distribution and generate \$3M incremental revenue
- **Cross-Functional Leadership:** Drove collaboration across engineering, data science, finance, operations, and compliance, aligning cross-functional teams on credit strategy and product priorities

nCino (NASDAQ: NCNO) | *Senior Product Manager → Product Manager → Associate PM*

Dec 2018 – Jan 2024

- **Pricing & Profitability:** Designed and shipped a pricing and profitability engine that calculated risk-adjusted return on capital (RAROC) at the deal and relationship level, dynamically suggesting interest rates to maximize both RAROC and win rates as new risk data became available
- **Regulated Product Development:** Shipped compliant lending products across multiple jurisdictions, working closely with legal and risk teams to balance underwriting innovation with regulatory requirements
- **Borrower Experience:** Owned the full borrower experience from application through funding and repayment, implementing UX improvements that increased completion rates by 40% and reduced loan decision time by 75%
- **Conversion Optimization:** Established continuous improvement culture through customer research and portfolio analytics, identifying friction points in the lending funnel and systematically eliminating them
- **Multi-Surface Ownership:** Managed products across origination, risk, and servicing dimensions, ensuring a cohesive experience throughout the borrower journey at 250+ banks and credit unions

Audialmusic.ai | *Founder & Product Lead*

Aug 2024 – Present

- **Solo Technical Build:** Built and launched a consumer platform from scratch, scaling to thousands of monthly active users with zero downtime—managing technical architecture, ML model development, data pipelines, and go-to-market independently
- **Growth & Experimentation:** Designed experimentation frameworks and measurement systems to track user behavior and feature performance, applying data-driven iteration to optimize conversion and retention

EDUCATION

MS, Business Analytics — Cameron School of Business, University of North Carolina Wilmington

2021

BS, Business Administration & Finance — Cameron School of Business, University of North Carolina Wilmington

2018

SKILLS

Lending & Risk: Consumer Lending, Underwriting Systems, Credit Decisioning, Expected-Loss Modeling, LTV Frameworks, Portfolio Monitoring, Delinquency Management, Risk Controls, Loan Origination, Repayment Workflows, Regulatory Compliance

Product & Technical: Funnel Optimization, Conversion Strategy, A/B Testing, ML/AI Integration, Platform Architecture, Python, SQL, Data Analysis, Cross-Functional Leadership, Stakeholder Management, Agile/Scrum
